The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status							
1)🛛	Responsive to communication(s) filed on <u>27 June 2003</u> .						
2a)□	This action is FINAL . 2b)⊠ This	action is non-final.					
3)□	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of 35 U.S.C. 102(b) which forms the basis for all obviousness rejections set forth in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-6, 8, 14, 19-20, 22 are rejected under 35 U.S.C. 102(a) as being unpatentable Jewell (US 5719891).

With respect to claims 1, 3, 6, 8,14, 19-20 Jewell '891 shows and discloses a VCSEL comprising a means or first mirror (Fig 5c: 82), and active means area (Fig 5c: 86), a confinement means or dielectric gain on active area having a cavity or opening (Fig 5c: 26, 28, 32), and a second reflecting means or mirror on said confinement means or dielectric gain guide (Fig 5c: 82, 84, 86, 26, 28, 32, 112)(Fig 5F) (Col 7: 15-50). Since claim 8 recites the same or identical elements/limitations it is inherent to use patents '891 to recite the method of making a gain VCSEL guide, product by process.

With respect to claims 2, 5, 22 Jewell '891 discloses the substrate comprises of InP or GaAs (Col 7: 1-5).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 4. Claims 4, 6-7, 9-13, 15-18, 21, 23-24, are rejected under 35 U.S.C. 103(a) as being unpatentable over Jewell (US 5719891).

With respect to claims 4, 6, 7, 9, 24 the claims further requires "dielectric gain comprises material from a group of SiO2, TiO2, SiN, and the like". Jewell '891 did not directly discloses that the dielectric materials, however Jewell did indirectly disclose the oxidation of the dielectric layer (Col 7:1-15, 35-60) and the use of silicon Si and the like (Col 11: 65-67) (Col 12: 1-10). It is within the general skill of a worker in the art at the time the invention was made to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice, in this case the use of SiO2 or the like materials. *In re Leshin, 125 USPQ 416*.

With respect to claims 10-13, 15-18, 21, 23 Jewell '891 discloses the brag reflectors (Fig 5c: 84, 112) having substrate made of InP or GaAs (Col 7: 1-5), the claim further requires that the first mirror is near lattice matching with the substrate or the active means (Col 6: 50-67). It is within the general skill of a worker in the art at the time the invention was made to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice, in this case the first mirror lattice match with the substrate or active means. *In re Leshin*, 125 USPQ 416.

Communication Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan N Nguyen whose telephone number is (571) 272-1948. The examiner can normally be reached on M-F: 7:30 - 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harvey Minsun can be reached on (703) 308-16741. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
